DELHI DUST SANDSTONE

The new **DELHI DUST SANDSTONE** wall cladding from Meteor Stone's superb International Collection of Natural Stones is about to revolutionize the Natural Stone Wall Cladding Market.

Here are some of the advantages in considering **Delhi Dust** from Meteorstone on your next project.

Easy to Lay

Delhi Dust Sandstone wall cladding comes in a honed finish with a tolerance of +-2mm. Product is available in 4 standard sizes 600 x 300 x 15mm-300 x 300 x 15mm-300 x 150 x 15mm & 150 x 150 x 15mm. Because of the superior compressive strength of the Delhi Dust it makes the product suitable for both wall and floor tiling.

You Get What You Pay For

The natural blend of colours you get in the range of **Delhi Dust** is simply unrivalled in the existing market place. The product registers high in density therefore adding value to the strength and durability of this particular sandstone. Although the product is a smooth honed finish, when sealed the product remains slip resistant making it suitable for use around pool and other wet areas. Rest assured you are getting a high quality product which would add value to any project at a cost effective and affordable price.

How's it dispatched/delivered?

Delhi Dust Sandstone Cladding will arrive on site in one of two ways, a crane truck or forklift where the product is carefully layered vertically in timber crates with a consistent number of m² in each crate.

Bottom line

Delhi Dust Sandstone Cladding is available NOW from Meteorstone. As a special introductory offer on our first shipment we have prices never to be seen again. Hurry, as this very limited quantity, On Sale, Will Not Last

Cladding @ \$55.00/m²
